

jessica peng

front-end engineer & experience designer

work experience

Senior Front-End Engineer

Adobe Inc. | December 2021 - present

- Led end-to-end design and front-end development of six key solutions, delivering:
 - Streamlined customer sandbox management for 100+ internal stakeholders.
 - Accelerated sandbox provisioning and deployment for enablement programs from 2-3 weeks to 1-2 days, accommodating up to 75 sandboxes and partners.
 - Enhanced product onboarding for three pilot customers through the integration of hands-on learning sandboxes with comprehensive technical lectures.
- Independently built and launched an internal knowledge-share and content management platform supporting 20+ products within Customer Engineering.
- Mentored our summer intern, offering guidance in technical and design best practices.

Freelance Graphic Designer

Self-employed | March 2021 - 2023

- Operated a best-selling graphic design shop on Etsy, earning a 4.8/5.0 rating, 500+ reviews, and 144 upvotes in customer service.
- Completed 3,000+ sales designing branding, marketing materials, merchandise, and vector graphics for print and web for various small businesses and individuals.

Graphics Intern, Immersive Storytelling

The New York Times | June 2018 - August 2018

- Designed 2D/3D cover images, infographics, and motion graphics for the augmented reality articles "Step Inside the Thai Cave in Augmented Reality" and "How We Created a Virtual Crime Scene to Investigate Syria's Chemical Attack."
- Prototyped photogrammetry assets on iOS using Maya, Scenekit, and Sketchfab and researched immersive technology for future articles.

Digital Media Intern

Molex LLC | May 2017 - August 2017

- Spearheaded the adoption of new technologies within the marketing team by developing VR/AR mock-ups and 3D motion graphics to showcase a new line of power connectors.
- Produced and animated a three-minute promotional video for an innovative gas sensor.

accomplishments

Design Finalist

Walt Disney Imagineering | January 2018

- Directed visual development for a theme park concept that was selected as one of six finalists in the annual design competition hosted by Walt Disney Imagineering.
- Designed the complete visual identity, including the branding, presentation materials, 3D architectural models, and illustrations to convey the park's narrative and guest experience.
